Classifications in Brief: The Neer Classification for ... The Neer fracture classification system provides a useful framework for clinical assessment of and research for proximal humerus fractures. This classification system has moderate interobserver reliability, and correlates to a large degree (albeit not perfectly) with complications and functional results.

Fractures (Broken Bones) - OrthoInfo - AAOS Common types of fractures include: Stable fracture. The broken ends of the bone line up and are barely out of place. Open, compound fracture. The skin may be pierced by the bone or by a blow that breaks the skin at the time of the fracture. The bone may or may not be visible in the wound. AO/OTA Classification In 1984, a group of AO surgeons led by Maurice E MÄ¼ller published the "Classification of Fractures", which was the first comprehensive, systematic fracture classification system. While it has been referred to by many different names, it was officially named the "MÄ¼ller AO Classification of fractures - long bones". Bone fracture - Wikipedia A similar classification is open versus closed treatment, in which open treatment refers to any treatment in which the fracture site is opened surgically, regardless of whether the fracture is an open or closed fracture.
